Russian ships latien with corn were saised at Kertch, having entered the barbor under the im-pression that it was still a Russian port. In the account from Arabat, 106 merchant vessels are reported to have been destroyed and we presume asclusive of the 69 ships destroyed and taken at Kerich and the five self-entrapped, making in the whole 180 ressels taken or destroyed. According to an Austrian telegraphic report, the allies have no less than 18 steamers in the Sea of Asoff, from which it must be manifest that no attempt can be made by the Russians again to establish themselves in any force, either at Kertch or Arabat, and it is not at all improbable that the sluss may take their attemption to Kerfe, once ies may next turn their attention to Kaffs, one the capital of the Crimes, under the name of

Kaffa has a good harbor for vessels of moderate Kaffu has a good harbor for vessels of moderate draught, and had the principal trade of the pentusula bofore the founding of Sebastopol. The Austrian Journals say that Bobastopol is provisioned for eight months. This we do not believe, had Sebastopol beto so amply supplied, what need of the immense magazines at Kertch and Arabat, beside that a besieged fortress open to bombarduest can never count upon the safety or its magazines? The same authority tells that the allies are preparing to attack the Russian army at interman with 100,000 men. It may be so, but we very much doubt that the Russian concert cannot, after the last two years' experience, delute them into the notion, that they can safely engage with snything like an equal number of English and French troops.

Mr. Snickles stated that the boy's mother, Mary Donahue, was an inmate of the Poor House, and that nearly every day this boy came up, and staying in the bushes a short distance from the building, made a signal, when his mother would go out and take whatever the buy brought-candres, little articles, bottles of whiskey, &c. Being satisfied that the boy stole these articles, he watched, and this (Monday) morning caught him near the Poor House with the articles produced in court in his possession, consisting of packages, papers of chewing tobacco. 26 cent pieces, package of wonden comba, four harmonicas, a lot of lead toys, rolls of flatling ines, candies, marbles, and segars, worth in at upwards of five dollars. The boy was brought it with his hands tied behind him, he having tried to give Spickles the slip. The mother and father of this boy have frequently been in jail-the mother has not long since been discharged after serving out a term of implicantment for stealing salico from a store on East Water street. For the benefit of the seven supervisors of this

As io moral insulation from his parents, he has received none .A sort of morbiaffection which still largers within his breast for the mother who bore him, is perverted by her to train him up as a thief. Is he to blame ?- Is he in reality guilty? He must be taken care of, for the protection of the public demands it-for this boy (and he is only one of at least one hundred in this city) has got his living for years by theft, and has been trught to do it by his parent -must not be permitted to continue in plundering the public. If there was a House of Refuge would not these seven Supervisors eav that this boy was a fit subject for admission? There no being one-but authority having been given by the Legislature to build one -why do they object to its being built? We senture the assertion, that had either of these seven Supervisor received the same treatment in their buyhood,the same system of training for a fail or the gallows which this unfortunate boy has, and that at the hands of their parents they would not have been in a position to deny to the outcast-and a thous and times worse than an orphan—the commo rights of humanity, or christmuity. The evidence in this case was of a similar character to that generally elicited in such cases, except that in this case the defendant had seized his wife by her hair, twisting his hands in it; throwing her down on the floor and biting deep into her arm with his teeth. The woman referred to other times when she had to complain of his treatment, when he he d beat ner adding: "don't you remember the other day when I came to you with my head best up? Well, that time he promised to take the pledge. and I let him off, and if he'll take the pledge now I'll forgive him."
